REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The applicants' affidavit filed 12/12/05 is found convincing, and there is no other art that applies. The prior art of record therefore fails to teach or fairly suggest a brain computer interface comprising a brain computer interface (BCI) computer having software configured to analyze electrocorticography (ECoG) signals to determine an intent of a user, in combination with all of the other limitations of the claims, or a method of controlling an output device wherein ECoG signals are computer processed to determine an intent of the user with respect to the output device, in combination with all of the other limitations of the claims. Electrocorticography or ECoG signals are those taken from the surface of the cerebral cortex, as defined on p. 5 of the instant specification, in contrast with signals taken from the scalp surface or within the cortex itself.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia C. Mallari whose telephone number is (571) 272-4729. The examiner can normally be reached on Monday-Friday 10:00 am-6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The
